

DASARI SATYA SAI ROHIT

+91 8121122896 dasarisatyasairohit@gmail.com Visakhapatnam, AP
LinkedIn GitHub: DasariSatyaSaiRohit

Objective

Full-stack engineer with production experience in React, Angular, NestJS, and Django REST Framework. Skilled in BI visualization (Highcharts), bulk data workflows, Redis caching, RabbitMQ messaging, and microservices API design.

Professional Experience

Akrivia Automation

July 2024 – May 2026

Software Development Engineer

Visakhapatnam, India

- Built custom BI dashboards (Highcharts/Angular) with 5+ drill-down charts and sub-200ms API responses via Redis caching.
- Designed complex forms end-to-end with Zod schema validation — field-level rules, cross-field constraints, and injection prevention.
- Built bulk Excel workflows (ExcelJS) handling 1,000+ row files with row-level validation and RabbitMQ integration for ACID consistency across microservice DBs.
- Reduced redundant DB queries by ~40% via Redis caching on high-frequency endpoints.
- Designed RESTful APIs with documented contracts and unit tests; async inter-service sync via RabbitMQ.
- Stack: MySQL, PostgreSQL, MongoDB, Jira, Git, Postman.

Projects

QueryMind — Natural Language to SQL Engine

2025

Tech: Python, FastAPI, React, NestJS, PostgreSQL, Redis, RabbitMQ, Celery, Docker

- Full-stack NL-to-SQL microservices: NestJS gateway (JWT auth, rate-limiting), FastAPI service (SQL generation/validation), React dashboard; supports PostgreSQL, MySQL, SQLite with multi-database routing.
- Async non-blocking architecture: Ollama LLM for SQL generation, three-layer validation (regex → SQLGlot AST → schema check), RabbitMQ for history persistence, Celery workers for background tasks.
- Enterprise security: Fernet encryption for credentials, SQL injection prevention, SELECT-only enforcement, request sanitization, role-based access control with JWT tokens.
- Performance optimization: Redis schema caching (sub-200ms responses), connection pooling via asyncpg, reduced introspection by ~60%; structured logging with request tracing across services.

ResumeJobMatcher — AI-Powered Job Finder

2025

Tech: Angular 17, TypeScript, Tailwind CSS, Anthropic API

- Browser-only tool: parses uploaded PDF/DOCX resume via `pdfjs-dist/mammoth`, sends to Claude API, returns 15 AI-matched job listings with apply links — no backend required.

Skills

Languages: Python | JavaScript | TypeScript | Java | C

Frontend: React | Angular | HTML | CSS

Backend: NestJS | Django REST Framework | FastAPI

Databases: PostgreSQL | MySQL | MongoDB

Infra: Redis | RabbitMQ | Docker | Git

Practices: API Design | Zod Validation | Unit Testing | Microservices | Agile

Education

Raghu Engineering College

Nov 2021 – Apr 2025

B.Tech, Computer Science & Engineering (IoT) — GPA: 8.85/10

Visakhapatnam, India

Achievements

- B.Tech Honours Degree** in Computer Science and Engineering
- DBMS** — NPTEL Certification, September 2024
